KEY FEATURES

- Projector < Active Conversion Chip
- Laptop to Monitor Connection Office Presentation Cable
- HDMI to VGA Cable 1080P Full HD Support
- Gold-Plated Connectors 1.8M Practical Length

PRODUCT DESCRIPTION

- Need to connect a laptop, desktop, decoder, or HDMI device to an older VGA monitor or projector? This HDMI to VGA Cable helps convert HDMI video output to VGA display input for basic screen connection.
- The 1.8M length is practical for office desks, classrooms, meeting rooms, projector setups, and home use.
- Supports Full HD video output up to 1080P, including common resolutions such as 720P and 1600×1200 on compatible devices.
- Built with an active HDMI to VGA conversion IC chip, allowing HDMI digital signal to be converted into VGA analog video signal.
- Male-to-male design means you can connect directly from an HDMI output device to a VGA display without needing separate HDMI and VGA cables.
- Gold-plated HDMI and VGA connectors help improve connection stability and reduce corrosion during normal use.
- Suitable for laptops, desktops, PCs, projectors, monitors, and compatible HDMI source devices.
- ⚠ Important: This cable works one way only — from HDMI source to VGA display. It does not convert VGA source to HDMI monitor or TV.
- ⚠ VGA carries video only. For sound, you may need a separate audio solution depending on your device setup.
- ⚠ Not recommended for Blu-ray, PS3, PS4, some Sony devices, Apple Mac systems, and low-voltage HDMI devices.
- ☑ Advantage: HDMI to VGA conversion + 1.8M length + 1080P support = affordable display solution for projectors and older VGA monitors.
- ☑ Best For
 - ☑ Office Presentations
 - ☑ Classrooms & Training Rooms
 - ☑ Projector Connection
 - ☑ VGA Monitor Setup
 - ☑ Laptop to Projector Display
 - ☑ Business & Meeting Rooms
 - ☑ Basic PC Display Connection
