KEY FEATURES

- Camera < Fixed voltage options available
- ▣ Suitable for routers and modems

▣ Good for LED devices
- ▣ TV box power support

▣ Multiple current ratings available
- ▣ 5V / 7V / 9V / 12V / 14V / 15V options
- ▣ AC 100V-240V to DC power adapter

▣ Mchongo huu si wa kukosa
- ▣ Useful for electronics repair

▣ POS / Terminal Device Support

PRODUCT DESCRIPTION

- Need a replacement power adapter for your router, CCTV camera, TV box, LED device, small speaker, POS machine, or other DC-powered electronics? These standard AC-to-DC power adapters are available in different fixed voltage options including 5V, 7V, 9V, 12V, 14V, and 15V.
 - Each adapter comes with one fixed output voltage. It is not adjustable, so you must choose the exact voltage that matches your device.
 - Available current options may include 0.5A, 0.7A, 0.9A, 1A, 1.5A, 2A, 3A, 4A and other existing ratings depending on the adapter model.
 - Supports AC 100V-240V input, making it suitable for normal home, office, shop, and workshop power use.
 - Suitable for many low-voltage electronics such as WiFi routers, internet modems, CCTV cameras, DVR/NVR units, LED strip controllers, TV boxes, small speakers, POS terminals, and similar devices.
 - Standard DC barrel connector design makes it useful for common electronics that use round DC charging ports.
 - Good option for replacing a lost, damaged, weak, or unstable power adapter, provided voltage, current, polarity, and connector size match correctly.
 - ▣ Mchongo huu si wa kukosa
 - ⚠ Important: Always check the label on your old adapter before buying. Match the output voltage exactly.
 - ⚠ Amperage must meet your device requirement. Using too low amperage may cause unstable power or failure to work.
 - ⚠ Connector size and polarity must also match. Voltage alone is not enough.
 - ⚠ These are fixed-voltage adapters, not adjustable adapters.
 - ▣ Advantage: Multiple fixed voltage options + AC 100V-240V input + standard DC barrel connector + wide device support = a practical replacement charger for common electronics.
- ▣ Best For
- ▣ WiFi Routers & Internet Modems
 - ▣ CCTV Cameras & Security Devices
 - ▣ TV Boxes & Media Devices
 - ▣ LED Strip Lights / LED Controllers
 - ▣ POS Machines & Terminal Devices
 - ▣ Small Speakers & Audio Devices
 - ▣ Home Electronics
 - ▣ Electronics Repair Technicians

ADDITIONAL SPECIFICATIONS

- Product Type: AC to DC Fixed Voltage Power Adapter
- Model Name: Standard DC Power Adapter
- Main Function: Replacement DC Power Supply
- Input Voltage: AC 100V – 240V
- Input Frequency: 50/60Hz
- Output Voltage Options:
 - DC 5V
 - DC 7V
 - DC 9V
 - DC 12V
 - DC 14V
 - DC 15V
- Output Current Options:
 - 0.5A
 - 0.7A
 - 0.9A
 - 1A
 - 1.5A
 - 2A
 - 3A
- Other available current ratings depending on adapter model
- Voltage Type: Fixed Voltage Only
- Adjustable Voltage: No
- Connector Type: Standard DC Barrel Plug
- Common Connector Use: Router, CCTV, LED, TV Box, Small Electronics and POS Device Power Input
- Compatible Device Categories:
 - WiFi Routers
 - Internet Modems
 - CCTV Cameras
 - DVR / NVR Units with Matching DC Input
 - LED Strip Lights and LED Controllers
 - TV Boxes
 - Small Speakers
 - POS Terminals
 - Small Office Devices
 - Low-Voltage Home Electronics
 - Repair and Testing Devices
- Not Automatically Compatible With:
 - USB-C Laptops
 - HP Blue Pin Chargers
 - Dell Smart Pin Chargers
 - Lenovo Square Tip Chargers
 - MacBook MagSafe or USB-C Chargers
 - Devices Requiring Different Polarity
 - Devices Requiring Higher Current Than Adapter Rating
 - Devices With Different Connector Size
- Safety Check Before Use:
 - Match voltage exactly
 - Match or exceed required amperage
 - Confirm connector size
 - Confirm polarity
 - Confirm device input label before plugging in
- Usage Type: Router Power Supply, CCTV Power Adapter, LED Power Adapter, TV Box Charger, POS Power Supply and Electronics Repair Use
- Best Use: Reliable replacement fixed-voltage power adapter for compatible DC-powered electronics
