PRODUCT DESCRIPTION

- Need to join two USB-C cables or extend your USB-C connection? This USB-C Female to Female Coupler Extender allows you to connect two USB-C male cables together for charging, data transfer, video output, and OTG use on compatible devices.
- Supports up to 100W fast charging when used with compatible USB-C PD chargers, devices, and cables.
- Designed for high-speed data transfer up to 40Gbps on compatible USB4, Thunderbolt 4, USB 3.2, and supported USB-C setups.
- Supports up to 8K video output on compatible devices, cables, and displays that support USB-C video output.
- Works with USB-C enabled phones, tablets, laptops, MP3/MP4 players, external storage devices, docking accessories, and OTG-supported devices.
- Compact coupler design makes it easy to carry in a laptop bag, technician kit, office drawer, travel pouch, or accessories box.
- ⚠ Important: This is a connector extender, not a signal converter. Your device, cable, and monitor must support video output for 8K display to work.
- ⚠ 100W charging and 40Gbps transfer only work when both cables and connected devices support those standards.
- 📦 Advantage: USB-C female-to-female connection + 100W support + 40Gbps data + 8K video compatibility = small but useful adapter for extending modern USB-C setups.
